Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1, 63-68 and 85-87, drawn to a method for evaluating image quality, classified in class 382, subclass 254,

II. Claims 69-84, drawn to method of determining interruption of image processing, classified in class 382, subclass 309. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. See MPEP § 806.05(d).

The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as evaluating image quality. Invention II has separate utility such as determining whether to interrupt processing of an image. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
